

RESOLUTION #20-09-01-02

**RESOLUTION OF THE TOWN OF NEW CARLISLE TOWN COUNCIL
REGARDING THE INDIANA ENTERPRISE CENTER**

WHEREAS, the Town of New Carlisle ("Town") Town Council recognizes that industrial development has occurred within the Core Development Area ("Core Area") of the Indiana Enterprise Center ("IEC") and that additional industrial and commercial growth is likely to occur in that area due to the presence of utilities, infrastructure and conditions which are favorable to development; and

WHEREAS, while growth and development are important for the Town, Olive Township, St. Joseph County and the larger region, development must be done in a responsible and planned manner that allows for proper protections for the area through zoning and design controls, proper protections for existing neighboring property owners through landscaping, buffering and proper setback, and proper protections for the environment, especially the aquifer and the Kankakee River; and

WHEREAS, the Town is concerned about the expanse of the geographic area of the IEC, the Town seeks to define the boundaries of the Core Area, minimizing the industrial and commercial uses allowable within the Core to achieve responsible, planned and orderly growth; and

WHEREAS, the Town desires to amend the IEC Area Management Plan as described in this Resolution by working with the Board of Commissioners, St. Joseph County Redevelopment Commission, Town Council, and Olive Township to consider the needs and concerns of each municipality and its citizenry and create a memorandum of understanding to that effect.

NOW, THEREFORE, BE IT RESOLVED by the Town of New Carlisle as follows:

Section 1. The Town requests the rezoning petition submitted by the Sebasty family (Bill 34-20) for the 640 acres south of State Road 2 be withdrawn. The Sebasty owned property that fronts on Edison Road and Early Road within the IEC Core can be refiled for zoning consideration at an appropriate time for potential development as determined by the Commission for industrial or appropriate commercial uses as agreed upon by the Commissioners, the Commission, the Town and Olive Township without remonstrance from the Town.

Section 2. The boundaries of the IEC Core Development Area will be clearly identified in the IEC Area Management Plan as shown in the attached exhibit. New industrial growth will be targeted to occur within the boundary area. It should be noted that the Navistar Proving Grounds, Carris Reels, and industrial businesses that are on the east side of Smilax Road are considered to be part of the IEC but are not considered to be located within the Core Area. Rezoning requests for industrial or appropriate commercial uses as agreed upon by the Commissioners, the Commission, the Town and Olive Township will be supported by all parties within the Core Area as the boundaries are generally consistent with the industrial growth and industrial reserve areas identified in the 2002 St. Joseph County Comprehensive Plan.

Section 3. The St. Joseph County Zoning Code and Town of New Carlisle Zoning Code identify a number of permitted uses, special exception uses, and controlled uses in the zoning classifications applicable to the Core Area. The Town resolves to work with the Commissioners, the Commission and Olive Township to minimize and define uses that are deemed as encouraged and acceptable commercial and industrial uses for future development in the Core Area. When applicable, this list of uses will be included with rezoning requests as written commitments to the St. Joseph County

Council or the Town of New Carlisle Town Council, as applicable, for their consideration during the rezoning process.

Section 4. The Town of New Carlisle has requested a buffer zone on the western edge of the Core Area be established. The Niespodziany Ditch and the Wooten Ditch, wetland and environmentally sensitive area, dramatic elevation changes, and protected woods and forested areas presently serve as a buffer between the Town and the industrial area. As such, the Niespodziany Ditch, from its connection point within the Wooten Ditch, to the point at which it crosses under the Norfolk-Southern Railroad tracks, should not be moved to preserve this buffer corridor.

Section 5. Design Guidelines and Standards shall be developed for the Core Area. These standards should be developed to supplement the language in the St. Joseph County Zoning Code and the Town of New Carlisle Zoning Code and address buffer zones and setbacks, green space requirements and development practices, landscaping that includes natural and native plantings, dark sky sensitive lighting, signage, drainage, integration of pedestrian paths and trails, and other sustainable features to differentiate the Core Area from other industrial areas in the County. The Design Guidelines and Standards should be followed in the planning of future development for the Core Area.

Section 6. The Town will not remonstrate against development within the Core that complies with the design guidelines and standards and allowable commercial and industrial use types conceived of in this resolution and which will be committed to writing in a future memorandum of understanding.

Section 7. The Commission and Commissioners shall work with the Town to determine the applicability of the use of funds from the New Carlisle Economic Development Area Tax Increment Finance (TIF) district to aid and assist in the development and expansion of a new water treatment facility being considered for construction by the Town. This new water treatment plant would replace the existing facility located at 31061 Edison Road. As part of the development of the new water treatment facility, the Town would establish a Water Capital Improvement Fund.

Section 8. St. Joseph County shall initiate the process of creating a new Countywide Comprehensive Plan, or a revision of the 2002 Comprehensive Plan, beginning this calendar year. The Commissioners and the staff of the Area Plan Commission will provide more direct, meaningful and on-going communication to the Town and Olive Township regarding the progress of the development or revision of the 2002 Comprehensive Plan. When applicable, the Commission and Commissioners will provide the Town and Township information about new economic development opportunities for the Core Area or in the County.

Section 9. Prior to the completion of a new Comprehensive Plan or a revision of the 2002 Comprehensive Plan, there exists the potential that a new development project might be proposed for a site that exists outside the Core Area. In those instances, the County will follow the standard procedure for rezoning through the Area Plan Commission. The Town and Township reserve the right to remonstrate against any property development outside the Core Area.

Section 10. Upon the adoption of a memorandum of understanding, the Commission will adjust the IEC Area Management Plan to reflect the agreed upon changes contained within the memorandum of understanding. Furthermore, a signed copy of the memorandum of understanding will be included as an Exhibit in the Appendix of the IEC Area Management Plan. Furthermore, the Commission will modify its marketing materials for the IEC to reflect the agreed upon changes within the memorandum of understanding.

Section 11. The Town will work to finalize a comprehensive plan for the Town of New Carlisle by third quarter 2021.

Section 12. This Resolution shall be in full force and effect upon its approval and adoption by the Town.

ALL OF WHICH IS PASSED AND RESOLVED BY THE TOWN COUNCIL OF THE TOWN OF NEW CARLISLE, INDIANA, THIS 1st DAY OF September, 2020.
